### **Status of Application**

1. Applicant's amendment, after Final Rejection, has been entered in the application. Claims 30-34, 36 and 43 are pending, claims 1-29, 35 and 37-42 having been canceled.

### **Specification**

2. The specification is objected to under 37 CFR 1.71 because it fails to provide a complete written description of the invention. On pages 8-10, the specification refers to an optimization of consumption, however, the specification fails to set forth how this optimization is achieved. While certain identified paragraphs refer to the controlling of internal combustion engine, generator and motors in response to an accelerator set point, there is no description of how any consumption is optimized, nor is there any identification of a particular optimization strategy. Appropriate correction is required.

### **Allowable Subject Matter**

3. Claims 30-34, 36 and 43 are allowed.

### **Response to Comments**

4. The Advisory Action, mailed February 17, 2005 was sent in error. Inasmuch as applicant has canceled those remaining rejected claims, the amendment filed after final should have been entered at that time. The examiner notes that while applicant has canceled those claims previously rejected to under 35 USC §112, first paragraph, the specification remains objected to for failing to adequately describe the invention.

### **Conclusion**

5. This application is in condition for allowance except for the following formal matters:

The specification remains objected to, as described in the Final Office action, and as additionally set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
